

EARTH 4

Create easily cleanable surfaces and keep them clean.

velvet and coils collect dirt and cat catches off the rug

Failed flashing causes paint failure producing lead dust

cooking without stove hood exhaust coats walls with grease and food particles

poorly caulked tub and leaking plumbing cause paint failure creating lead dust

uncovered soil in crawl space gets blown into

basement and into living areas

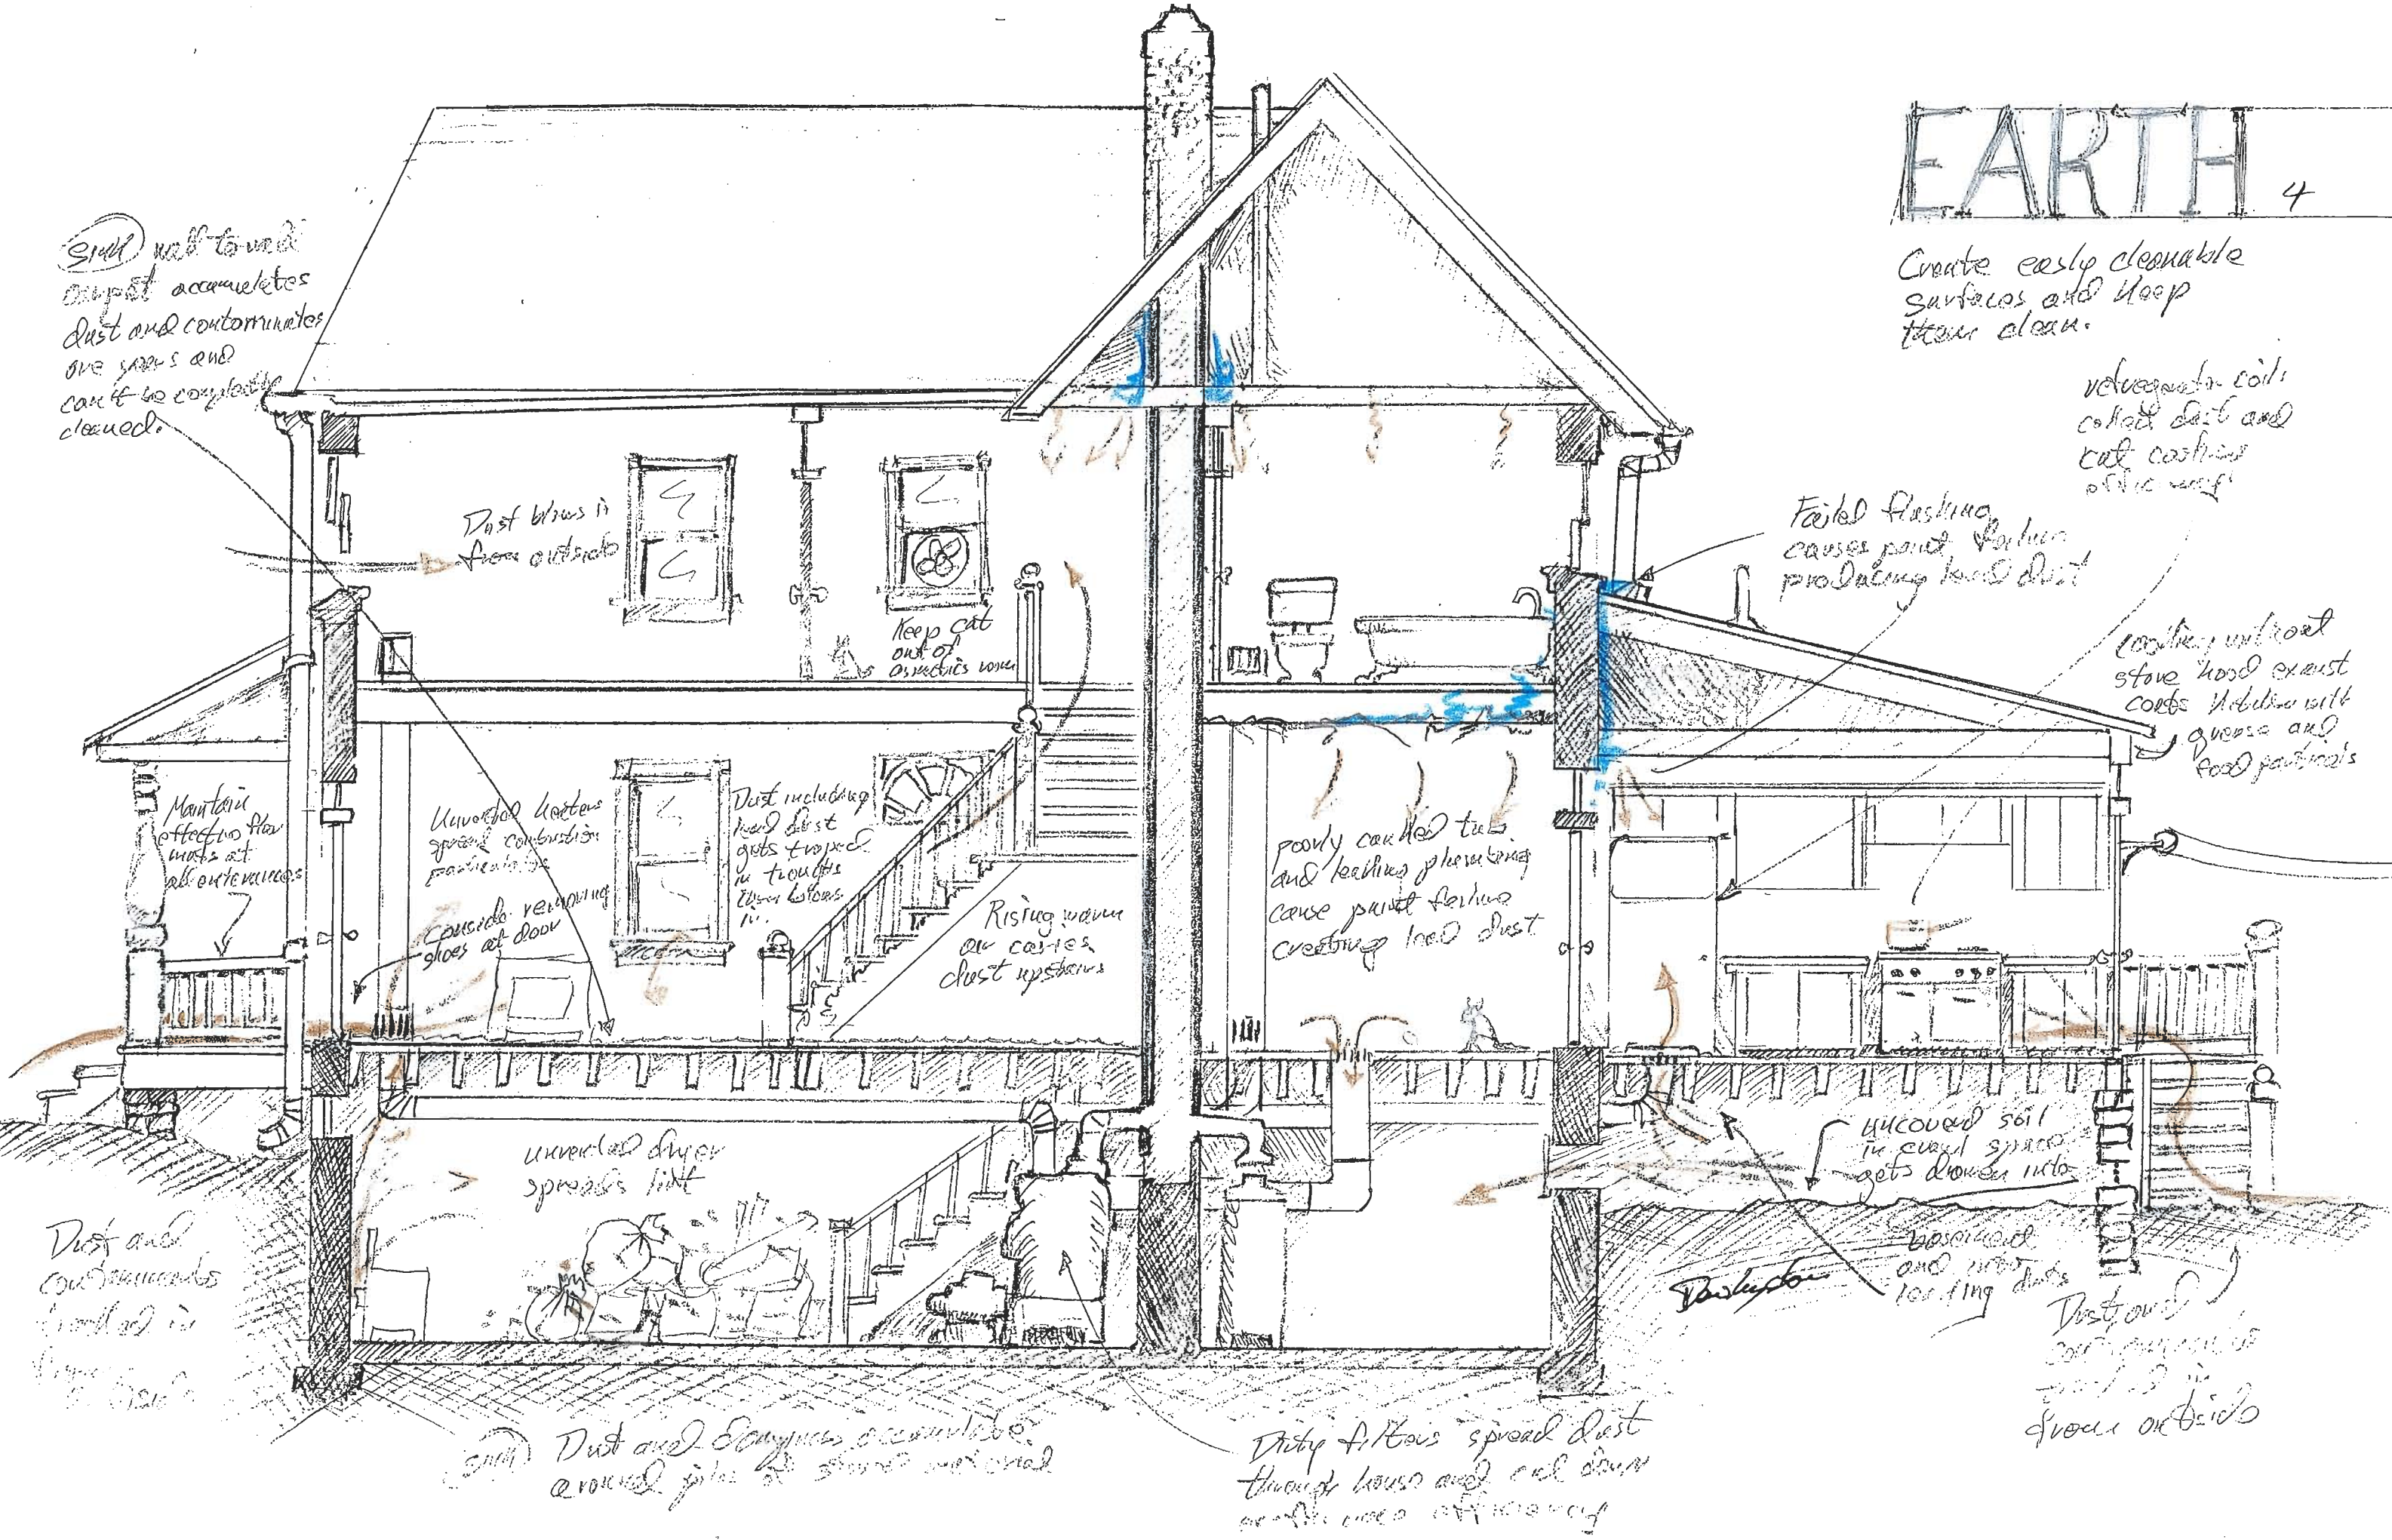

Dust and contaminants tracked in from outside

Dirty floors spread dust through house and out down street into atmosphere

Small Dust and Emissions accumulate around pile of stored material

Dust and contaminants tracked in from outside

Small wall to wall carpet accumulates dust and contaminants over years and can't be completely cleaned.

Dust blows in from outside

Keep cat out of bedrooms

Maintain effective floor mats at all entrances

Uncovered baskets spread contaminants

Consider removing shoes at door

Dust including lead dust gets trapped in clutter like baskets

Rising warm air carries dust upstairs

uncovered dryer spreads lint
