

**National Center for
Healthy Housing**

National Healthy Homes Training Center and Network

The National Healthy Homes Training Center and Network (Training Center) offers cutting edge training and professional development in the field of healthy housing. Having trained over 14,500 people since its inception in 2004, the Training Center is creating a workforce that understands how to find and resolve hazards in the home environment.

The Training Center:

- **Brings together public health and housing practitioners** to promote practical and cost-effective methods for making homes healthier.
- **Serves as a forum** for exchanging information on new research and best practices.
- **Promotes cross-training** of public health and housing practitioners.
- **Identifies and optimizes opportunities** for networking, collaboration, and partnerships.

Training with a Higher Purpose

Our trainees are dedicated professionals committed to making a difference in their communities through safe and healthy housing. Released in 2009, the U.S. Surgeon General's *Call to Action to Promote Healthy Homes*, underscored the public health import of housing and endorsing the "seven principles of healthy housing," which serve as the cornerstone of the Training Center's curricula.

Trainees learn critical skills and increase their knowledge of the seven principles of healthy housing, while also becoming inspired to serve as thought leaders, resources, conveners, and advocates in their communities.

Trainees also have the opportunity to advance their professional status and distinguish themselves by becoming a "Healthy Homes Specialist." Administered jointly by the National Center for Healthy Housing and the National Environmental Health Association, the Healthy Homes Specialist Credential signifies professional

Essentials for Healthy Homes Practitioners

Nearly 97% of participants say that they would recommend this course to a colleague, and over 85% said they could immediately incorporate the concepts they learned into their daily work.

This is what a few of our trainees have said about the Essentials course:

"The course was excellent! I will now look at houses as well as my own house from a different perspective."

"This course is just powerful! It gave me holistic, relevant, extremely useful skills that can be used for a lifetime."

"Every aspect of this training course has been beneficial both professionally and personally. I am forever changed!"

"The Essentials course is truly designed to help uplift the quality of life and safety of others."

expertise in the field of healthy housing. The exam for this credential often is offered at the end of the Essentials course. Learn more about the credential at nchh.org/Training/Healthy-Homes-Specialist-Credential.aspx.

Healthy Homes Tools and Resources

The Training Center's website offers extensive resources, including profiles of housing conditions in many jurisdictions and information about state and local codes. It has the latest research and information on special topics, such as lead-safe renovations, integrated pest management, assessment tools, and the seven principles of healthy housing. Visit the website today to find the following useful resources:

- Searchable database of latest research: nchh.org/Resources/Healthy-Housing-Clearinghouse.aspx
- Survey for housing-related problems nationally, regionally, and in 46 large cities: nchh.org/Training/HealthyHomesTrainingCenter/AHSDData.aspx
- Health-related laws and codes, including state and local housing codes: nchh.org/Policy/National-Policy/International-Property-Maintenance-Code.aspx
