

110TH CONGRESS  
2D SESSION

**S.** \_\_\_\_\_

To establish the Council on Healthy Housing, and for other purposes.

---

IN THE SENATE OF THE UNITED STATES

Mr. REED (for himself and Mr. HAGEL) introduced the following bill; which  
was read twice and referred to the Committee on \_\_\_\_\_

---

**A BILL**

To establish the Council on Healthy Housing, and for other  
purposes.

1       *Be it enacted by the Senate and House of Representa-*  
2       *tives of the United States of America in Congress assembled,*

3       **SECTION 1. SHORT TITLE.**

4       This Act may be cited as the “Healthy Housing  
5       Council Act of 2008”.

6       **SEC. 2. FINDINGS.**

7       Congress finds the following:

8               (1) In the United States—

9                       (A) 6,000,000 households live in homes  
10                      with moderate or severe physical hazards;

1 (B) 24,000,000 homes have significant  
2 lead-based paint hazards;

3 (C) 11,000,000 homes have had leaks in  
4 the last 12 months;

5 (D) 6,000,000 homes have had signs of  
6 mice in the last 3 months; and

7 (E) 1 in 15 homes have dangerous levels of  
8 radon.

9 (2) Residents of housing that is poorly de-  
10 signed, constructed, or maintained are at risk for  
11 cancer, carbon monoxide poisoning, burns, falls, ro-  
12 dent bites, childhood lead poisoning, asthma, and  
13 other illnesses and injuries. Vulnerable subpopula-  
14 tions, such as children and the elderly, are at ele-  
15 vated risk for housing-related illnesses and injuries.

16 (3) Because substandard housing typically  
17 poses the greatest risks, the disparities in the dis-  
18 tribution of housing-related health hazards are strik-  
19 ing. 1,200,000 housing units with significant lead-  
20 based paint hazards house low-income families with  
21 children under 6 years of age.

22 (4) Minority populations also tend to be dis-  
23 proportionately affected by housing-related illnesses,  
24 including lead poisoning and asthma. According to  
25 the Centers for Disease Control and Prevention,

1 non-Hispanic blacks and Mexican Americans are ap-  
2 proximately 3 times as likely to have elevated blood-  
3 lead levels, compared to non-Hispanic whites. The  
4 non-Hispanic black population has an asthma mor-  
5 tality rate 3 times greater than the rate for the non-  
6 Hispanic white population.

7 (5) The annual costs for environmentally attrib-  
8 utable childhood diseases in the United States, in-  
9 cluding lead poisoning, asthma, and cancer, total  
10 \$54,900,000,000. This amount is approximately 3  
11 percent of total health care costs.

12 (6) Appropriate housing design, construction,  
13 and maintenance, timely correction of deficiencies,  
14 planning efforts, and low-cost preventative measures  
15 can reduce the incidence of serious injury or death,  
16 improve the ability of residents to survive in the  
17 event of a major catastrophe, and contribute to over-  
18 all well-being and mental health. Housing units that  
19 are kept lead-safe are approximately 25 percent less  
20 likely to have another child with elevated blood lead  
21 levels. Properly installed and maintained smoke  
22 alarms reduce the risk of fire deaths by 50 percent.

23 (7) Providing healthy housing to families and  
24 individuals in the United States will help prevent an  
25 estimated 240,000 elevated blood lead levels in

1 young children, 11,000 unintentional injury deaths,  
2 12,000,000 nonfatal injuries, 3,000 deaths in house  
3 fires, 14,000 burn injuries, and 21,000 radon-associ-  
4 ated lung cancer deaths that occur in United States  
5 housing each year, as well as 20,000,000 asthma  
6 cases and 14,000,000 missed school days.

7 (8) While there are many programs in place to  
8 address housing-related health hazards, these pro-  
9 grams are fragmented and spread across many agen-  
10 cies, making it difficult for at-risk families and indi-  
11 viduals to access assistance or to receive comprehen-  
12 sive information.

13 (9) Better coordination among Federal agencies  
14 is needed, as is better coordination at State and  
15 local levels, to ensure that families and individuals  
16 can access government programs and services in an  
17 effective and efficient manner.
