

## Healthy Homes at HUD.

Forty percent of U.S. homes have at least one significant health or safety hazard that places American families at unnecessary risk for injuries and illness, such as lead poisoning, asthma, carbon monoxide exposure, fire, and lung cancer; fortunately, evidence-based, cost-effective solutions exist. Healthy homes programs at HUD **work to provide safe, decent, and sanitary homes and combat the hazards posed by unhealthy housing.** In fact, recent research showed that children living in federally assisted housing had significantly lower blood lead levels compared to children from similar backgrounds who did not receive housing assistance.

The programs highlighted below include only some of HUD’s mechanisms for providing safe and affordable housing. **Many of HUD’s other programs, including public and tribal housing, housing choice vouchers, project-based Section 8, and multifamily assisted housing, also spend funds on lead hazard identification and control.** Further, HUD’s work also supports and complements other programs and departments across the federal government (e.g., EPA, HHS, USDA). For more information on why support for all federal healthy homes programming is critical, please **see NCHH’s other agency fact sheets.**

			
<p><b>OLHCHH</b> Office of Lead Hazard Control and Healthy Homes</p>	<p>Supports state and local programs to <b>reduce lead hazards from paint, dust, and soil</b> in homes.</p> <p><b>Enforces the Lead Safe Housing Rule and other regulations,</b> together with program offices.</p> <p>Ensures <b>disclosure of known lead</b> during rent or sale.</p>	<p><b>FY18 funding was \$230 million,</b> the highest appropriation for this office to date.</p>	<p>HUD estimates that <b>265,000 more children would have been lead poisoned in 2010</b> without OLHCHH actions to control hazards in homes.</p> <p>Removing lead paint hazards from older housing provides a <b>\$1.39 return for every \$1 invested.</b></p>
<p><b>CDBG</b> Community Development Block Grants</p>	<p>Many states and localities use these funds to <b>provide match funding for HUD lead and healthy homes grants</b> and for making affordable homes lead-safe when rehabilitating them.</p>	<p><b>FY18 funding was \$3.3 billion,</b> the highest appropriation since 2011.</p>	<p>FY17 grants funded <b>rehabilitation, construction, or modernization to almost 71,000 households,</b> including over 2,000 abatements, 7,500 interim control interventions, 61,000 instances of lead-safe work practices, 1,800 energy efficiency improvements, and 2,600 individual lead screenings.</p>
<p><b>HOME</b> HOME Investment Partnership Program</p>	<p>HOME grants to state and localities are used for <b>building, buying, and rehabilitating affordable housing.</b></p>	<p><b>FY18 funding was \$1.4 billion,</b> the highest appropriation since 2011.</p>	<p>HOME funds have <b>rehabilitated over 530,000 units and built another 322,000.</b></p>
