

LEAD-SAFE TOOLKIT FOR HOME-BASED CHILD CARE

FREE RESOURCES!

<http://bit.ly/Lead-SafeToolkit>

THERE IS NO SAFE LEVEL OF LEAD IN A CHILD'S BLOOD.

Exposure to invisible sources of lead found in WATER, PAINT, SOIL/DUST, or CONSUMER PRODUCTS can cause irreversible damage to a child's brain.

TOOLKIT CONTENTS

- Poster for display in family child care home.
- List of science-based, user-friendly lead prevention resources.
- Lead prevention policies and worksheets, with easy-to-follow steps for finding out if lead hazards exist in the home and what to do to reduce any exposures.

The Lead-Safe Toolkit for Home-Based Child Care offers a variety of FREE resources to help home-based providers reduce lead hazards in their child care homes.
