e-mail:	tneltner@nchh.org					

2) Copyright Release: In accordance with Council Policy #28 Code Development, all Code Change Proposals, Floor Modifications and Public Comments are required to include a copyright release. A copy of the copyright release form is included at the end of this form. Please follow the directions on the form. This form as well as an alternative release form can also be downloaded from the ICC website at www.iccsafe.org. If you have previously executed the copyright release, please check the box below:

2007/2008 Cycle copyright release on file

3) Code Change Proposal Number:

Indicate the Code Change Proposal Number that is being addressed by this Public Comment: PM7-07/08

4) Public Comment: The Final Action requested on this Code Change Proposal is: (Check Box)

Approved as Submitted (AS):
 Approved as Modified by this Public Comment (AMPC):
 Approved as Modified by the Code Committee as Published in the ROH (AM):
 Approved as Modified by Assembly Floor Action as Published in the ROH (AMF):
 Disapproved (D):

5) Proposed Modification (AMPC only):

505.4 Carbon monoxide alarms. Every dwelling unit with an attached garage or fuel burning furnace, water heater, or appliance shall have a carbon monoxide alarm.

Modification Continued (Attach additional sheets as necessary)

6) Reason (State the reason and justification to support the Public Comment. Include a bibliography of any substantiating material. It is the responsibility of the commenter to make the material available at the Final Action Hearing):

See next page.

Reason Continued (Attach additional sheets as necessary)

PLEASE USE SEPARATE FORM FOR EACH PUBLIC COMMENT
 SUBMITTAL AS A DOCUMENT ATTACHED TO AN EMAIL IS PREFERRED
 SEE BACK OF FORM FOR DIRECTIONS ON WHERE TO SEND PUBLIC COMMENTS

Reasons for Proposed Modification

The committee gave the following reasons for the disapproval: “The committee indicated that requiring carbon monoxide alarms retroactively could burden municipalities with respect to enforcement and inspections. Further, this requirement is beyond the requirements for new construction in the International Residential Code (IRC) and is therefore not appropriate for existing structures.”

The proposed modifications address the committee’s concerns by replacing the word “install” with “have.” The word “install” implied that the alarm needed to be part of construction. Instead, the alarms can be easily added to any home and need to be replaced every few years. They can be plugged into any outlet and do not need to be hard-wired. No structural changes are needed.

This provision will also allow the jurisdiction to align its property maintenance code with state and local laws that require carbon monoxide alarms. Twelve states and more than 100 communities have retroactively required carbon monoxide alarms in existing homes to save lives.

In addition, in rental property the requirement would be self-implementing since most state landlord-tenant laws require compliance with housing and property maintenance codes as a condition of all residential leases.

Carbon monoxide is an odorless, tasteless, invisible gas that kills more than 200 people in homes each year. Thousands more go to the hospital with carbon monoxide poisoning. People in all regions of the country experience carbon monoxide poisoning. After several revisions directed by the Consumer Products Safety Commission, carbon monoxide alarms now reliably and cost effectively warn residents of the presence of life threatening levels of carbon monoxide. The alarms cost about \$25 each.
