## 2018 Healthy Housing Fact Sheet

Unhealthy conditions found in hazardous housing can lead to lead poisoning, asthma, respiratory illness, cancer, and unintentional injuries, resulting in missed school days and poor school performance for children, as well as missed work days for parents. To protect the health of Alaska families and prevent continued increases in associated healthcare costs and societal consequences, full federal funding is needed for critical programs and services:

AK received funding since 2016?

<b>CDC's Healthy Homes and Lead Poisoning Prevention Program</b>	<b>YES</b>
<b>CDC's National Asthma Control Program</b>	<b>NO</b>
<b>CDC's Environmental Health Tracking Network</b>	<b>NO</b>
<b>HUD's Office of Lead Hazard Control and Healthy Homes</b>	<b>NO</b>
<b>HUD's Community Development Block Grants (CDBG)</b>	<b>YES</b>
<b>HUD's HOME Investment Partnerships Program</b>	<b>YES</b>
<b>EPA's Lead Categorical Grants</b>	<b>NO</b>
<b>EPA's Radon Categorical Grants</b>	<b>YES</b>
<b>EPA's Drinking Water Revolving Fund</b>	<b>YES</b>
<b>HHS' Maternal and Child Health Block Grants</b>	<b>YES</b>
<b>HHS' Low Income Home Energy Assistance Program (LIHEAP)</b>	<b>YES</b>
<b>DOE's Weatherization Assistance Program</b>	<b>YES</b>

Full funding to federal programs such as these will help to address many of the risks and burdens facing the families and residents of Alaska, including:

In Alaska, **28% of children live in households with a high housing cost burden**, and 14% of children live in poverty.

Only **1.4% of Alaskan children under six years of age were tested for elevated blood lead** in 2012; elevated blood lead levels were found at a rate of 23 cases per 100,000 children.

**41% of Alaska housing was built before 1978** and is likely to contain lead-based paint.

On average, **7 Alaskans die annually from carbon monoxide exposure** (2011-2015).

Approximately **50,000 Alaskan adults have current asthma**, over 9% of the adult population (2015).

An estimated **\$18 million in Medicaid payments was attributed to asthma** in Alaska in 2015.

In 2016, **falls were responsible for 51 deaths, 1,600 hospitalizations, and 123 emergency department visits** among Alaskans aged 65 and older. One out of three older Alaskans fall each year.

In Alaska, **21% of collected radon tests had levels above the EPA action level** for indoor air (1990-2014).
