

ALABAMA

2024 Healthy Housing Fact Sheet

Hazardous conditions found in unsafe housing can lead to lead poisoning, asthma and other respiratory illnesses, cancer, and unintentional injuries or death, resulting in poor school attendance and performance for children, missed workdays for parents, and the loss of loved ones for all. These hazards and their health impacts disproportionately affect communities of color and low-income communities, making the need for healthy housing a significant environmental and racial justice issue. Recent events, such as the COVID-19 pandemic and climate change, along with the associated increase in both incidence and severity of extreme weather events, have urgently underscored and amplified our need for safer, healthier, affordable, and more resilient housing and drawn much-needed attention to the expanding scope of related programs and policies. Increased time spent at home and ongoing challenges to healthy housing service delivery due to these events and others have affected health negatively and displayed—in sharp contrast—the longstanding crisis of inequitable access to quality housing and healthcare.

In Alabama, **26% of children live in households with a high housing cost burden**, and 22% of children live in poverty (2021).

In Alabama, **43% of housing was built prior to 1978** and may contain lead-based paint.

Approximately **10% of adults** and **10% of children** in Alabama have **current asthma** (2021).

238 Alabamans aged 65 years and older died from unintentional falls in 2020.

In 2020, **759 Alabama children under 6 years of age tested had an elevated blood lead level** (5 µg/dL or more); almost **14,000 children had any level of lead** in their blood.

On average, **11 Alabamans die annually from carbon monoxide exposure** (2017-2021).

Homes located in **15 counties throughout northern and central Alabama** have a predicted average indoor screening level **greater than the EPA action level for radon**.

In Alabama, there are **no laws regulating building mold standards, testing requirements, or accreditation/certification** for contractors performing **mold testing or remediation activities**.

CRITICAL FEDERAL FUNDING FOR HEALTHY HOUSING

A broad array of programs across the federal government support healthy housing activities and related efforts including increasing affordable housing, improving health outcomes, providing supportive services to families, improving energy efficiency, and identifying and addressing environmental hazards. Critical programs and services supporting crucial health and housing services in states and localities are outlined below; increasing appropriations allows new states to access funding and currently funded states to expand their programs.

Has AL received funding since 2021?

CDC's:

- ✓ **Childhood Lead Poisoning Prevention Program**
- x **National Asthma Control Program**
- x **Environmental Health Tracking Network**

HUD's:

- ✓ **Office of Lead Hazard Control and Healthy Homes**

EPA's:

- ✓ **Lead Categorical Grants**
- ✓ **State Indoor Radon Grants**
- ✓ **Environmental Justice Grants**

DOE's:

- ✓ **Weatherization Assistance Program**

For more information on these programs and their impacts, as well as many others available to support healthy housing efforts, refer to [NCHH's Agency Fact Sheets](#).

May 2024. For **references**, additional **state-specific** healthy homes information, and to learn how you can **engage your members of Congress** on these vital issues...
