

TEXAS

2022 Healthy Housing Fact Sheet

Hazardous conditions found in unsafe housing can lead to lead poisoning, asthma and other respiratory illnesses, cancer, and unintentional injuries or death, resulting in poor school attendance and performance for children, missed workdays for parents, and the loss of loved ones for all. These hazards and their health impacts disproportionately affect communities of color and low-income communities, making the need for healthy housing a significant environmental and racial justice issue. The COVID-19 pandemic has revealed, urgently, our need for safer, healthier, and affordable housing: The increased time spent at home and challenges to healthy housing service delivery have not only affected health negatively but also displayed—in sharp contrast—the longstanding crisis of inequitable access to quality housing and healthcare. In addition, climate change and the associated increase in both incidence and severity of extreme weather events are expanding the scope of policies contributing to healthy housing.

In Texas, **31% of children live in households with a high housing cost burden**, and 20% of children live in poverty.

37% of Texas housing was built prior to 1978 and may contain lead-based paint.

In 2019, **4,763 Texas children tested had an elevated blood lead level** (5 µg/dL or more).

Over **7% of adults** and **almost 7% of children have current asthma** in Texas (2020).

In 2016, there were **over 6,315 pediatric hospitalizations due to asthma** in Texas, amounting to **over \$149,800,000 in total charges**.

In 2020, **unintentional falls were responsible for 1,952 deaths among Texans** over the age of 65.

On average, **60 Texans die annually from carbon monoxide exposure** (2015-2019).

The **Panhandle and western areas of Texas have the highest risk for radon** in the state, with **basement averages over 8 pCi/L**, twice the EPA action level. **The eastern, southern, and central areas of Texas also have basement averages between 4-8 pCi/L.**

CRITICAL FEDERAL FUNDING FOR HEALTHY HOUSING

A broad array of programs across the federal government support healthy housing activities and related efforts including increasing affordable housing, improving health outcomes, providing supportive services to families, improving energy efficiency, and identifying and addressing environmental hazards. Critical programs and services supporting crucial health and housing services in states and localities are outlined below; increasing appropriations allows new states to access funding and currently funded states to expand their programs.

Has TX received funding since 2020?

CDC's:

- ✓ **Childhood Lead Poisoning Prevention Program**
- ✓ **National Asthma Control Program**
- x **Environmental Health Tracking Network**

HUD's:

- ✓ **Office of Lead Hazard Control and Healthy Homes**

EPA's:

- ✓ **Lead Categorical Grants**
- ✓ **State Indoor Radon Grants**
- ✓ **Environmental Justice Grants**

DOE's:

- ✓ **Weatherization Assistance Program**

For more information on these programs and their impacts, as well as many others available to support healthy housing efforts, refer to **NCHH's Agency Fact Sheets**.

December 2022. For **references**, additional **state-specific** healthy homes information, and to learn how you can **engage your members of Congress** on these vital issues...
