

## **Healthy Homes Maintenance Checklist**

The following checklist was developed for the National Center for Healthy Housing (NCHH) as a tool for healthy home maintenance. A healthy home is one that is constructed, maintained, and rehabilitated in a manner that is conducive to good occupant health.

To maintain a healthy home, occupants should keep it dry, clean, safe, well-ventilated, free from contaminants and pests, well-maintained, and thermally controlled.

Spring
Fall
Annual
As Needed
Pro Needed?

YARD AND EXTERIOR				
Direct water drains away from house	•			
No hazards for tripping/falls, choking, or sharp- edges	•	•		
Verify that the pool fence is intact	•	•		
Check for signs of rodents, bats, roaches, or termites	•	•		
Drain outdoor faucets and hoses	•	•		
Clean window wells and check for drainage	•	•		
Clean gutters and downspouts	•	•		

	Spring	Fall	Annual	As Need	Pro Nee
BASEMENT AND CRAWLSPACE					
No wet surfaces, puddles, or musty odor	•	•			
Ensure that the sump pump and check valve are working	•	•			
Ensure that the floor drain is working	•				
Vacuum basement surfaces	•				
Check for signs of rodents, bats, roaches, or termites		•			

Good home maintenance can act to reduce allergens, prevent illness, and prevent accidental injuries. This checklist provides basic guidelines; items may need to be checked more often depending on local conditions and manufacturer recommendations.

Developed by Terry Brennan and Ellen Tohn, technical advisors to NCHH. Revised by NCHH staff, May 2018.
